React | Nodejs Fullstack Web Developer

I am a front end web developer with 2 years experience working with javascript, node.js, express and mongodb to create backend web servers. I use react + redux to render the database information and manage state efficiently to the client . I also use JWT web tokens for authentication and authorization of the user information in node js servers i create. I specialize in node js for backend services development.

- Software Development and integration
- User Experience

- Code Maintenance
- Debugging & Research
- Frontend Web development

- Backend Web Development
- Nodejs
- Reactjs

PROFESSIONAL EXPERIENCE

Fullstack Web Developer | E-shop, Remote. Website link   **06/2023 – Present**

- Designed and developed an ecommerce website that focuses on both customers and vendors to provide to them the functions that lets them experience what they are looking for. It gives the customers the ability to order products or save for later and it gives the vendors the ability to manage users, products and orders made.

- Utilized React, JavaScript and nodejs to enhance both front-end and back-end functionalities, adhering to SCRUM best practices and spearheading effective release management.

- Practiced cross-functionally with user interface mobile design best methods while executing quality assurance testing to resolve bugs and optimize performance.

- *Technology Used*: Reactjs, JavaScript, Expressjs, Nodejs, MongoDB, TailwindCSS, GitHub, Git.

Fullstack Web Developer | E-stock, Remote. Website link   **01/2023 – Present**

- a full-stack web application that provides businesses the access to manage their stock inventory and track expired products and products that are nearing expiration.

- I added a feature to generate qr codes for each product for customers to scan with their mobile phones and see the details about the particular product they want and the availability.

- Communicated effectively with all technical and non-technical partners and stakeholders to ensure a shared understanding of all features implemented.

- Successfully improved the crash-free rate of the application by implementing unit testing and thorough debugging to ensure no breakage.

- *Technology Used*: Reactjs, Javascript, Nodejs, Expressjs Mongo Database, SASS, GitHub, Git.

TECHNICAL SKILLS

Programming Languages : JavaScript

Database : MongoDB

Software/Tools : Visual Studio Code, GitHub, Node(Express.js), ReactJS, Figma
